

# Spring 2022 After Action Report

## Main Objectives

Medical Area/Triage  
Working with Forms  
Shift Change

## Scenario

Cascadia quake on a weekend mid-day with rain in the forecast  
Day of response  
Do we provide 24-hour response/medical?

## Teams

For this CDE, we divided teams into seven geographic areas. The seven teams were comprised of NETs from several teams within that area.

Teams	Pre-registered	Attendance Day Of
North	17	14
Northeast	15	11
Northwest	16	11
South	16	11
Southeast	17	9
Southwest	26	17
Outer Eastside	16	12

## The Numbers

Total number of registrants	148
Participants (registered)	131
Participants (day of registered)	112
Participants (day of, actually participated)	85
Number of teams (geographic regions this time)	7
Proctors	7
Observers from other jurisdictions	4
Subnets	5

Six participants shared their unique Zoom codes with others creating confusion as well as some being bounced from the rooms. PBEM had told everyone NOT to share their links, yet they did.

## Hours

17,467 minutes logged / 60 = 291.12 hours logged

## Feedback Scores

CDE Feedback Scores - Perfect Score is 5.00						
Date	The exercise was well structured and organized.	The overall exercise was plausible and realistic.	The individual scenarios were plausible and realistic.	The exercise will help me be a better NET member.	I felt that my participation was valued and necessary.	The Incident Commander built a strong plan.
Spring 2022	3.14	3.14	3.26	3.05	2.86	2.52
Fall 2021	4.31	3.79	4.32	4.03	4.35	4.08
Spring 2021	3.86	3.86	3.83	4.08	3.82	3.43

## What do participants want to focus on for the fall CDE

Water/food/sanitation	16
Working with forms	14
ICS	12
Using team ops plan	11
Building size-up	10
Search & Rescue techniques	8
Logistics	5
Medical triage	2
Using maps	1
How to take charge	1
How to make decisions quickly	1

## Comments from participants

Many liked working with NETs they have not met before. They felt that was realistic, as we do not know where we will be during a real emergency.

Is there a list of neighborhood staging areas and/or team leads in case we find ourselves outside of our own neighborhood? There is, online, but we should produce a list that could be carried in our NET bags.

Many appreciated the team meetings ahead of the CDE and they liked having access to the forms and scenario ahead of time.

When virtual, allow 15 minutes before the exercise begins to organize and assign roles. *(This time around teams should have made those decisions ahead of time as all participants received the team list two weeks prior to the CDE).*

Excellent comment from one participant – it is easy to get caught up in the details and lose the big picture.

Many voiced that the scenario was too complicated with too many moving parts. Others liked the content.

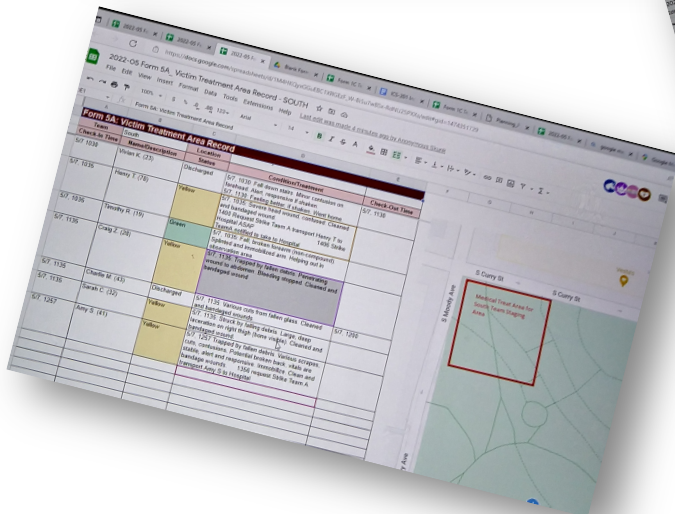

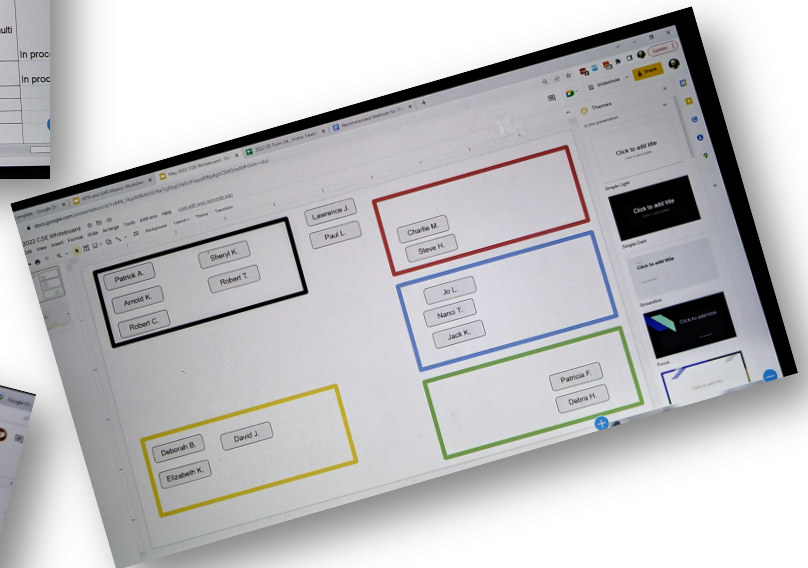

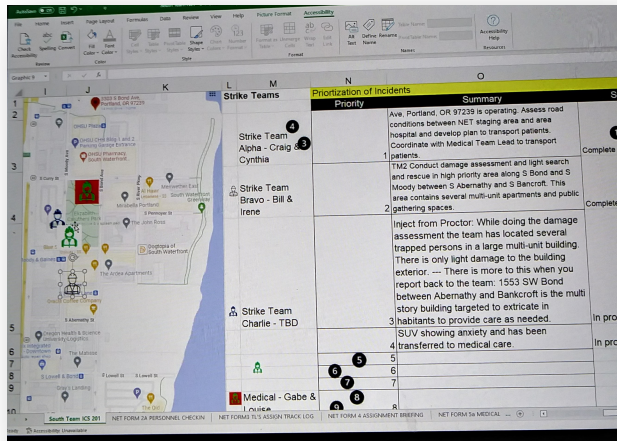

Good injects and a realistic scenario.

Several felt that their Incident Team Lead(s) (ITL) did not know how to lead and/or react to the scenario. ITLs need to be decisive when making assignments, rather than spending the majority of the exercise instructing members on ICS.

*(Good opportunity for further training prior to the next CDE – perhaps also a checklist.)*

Virtual exercise – provide photos/drawings of buildings rather than just a description.

Two teams assigned more members to be chiefs and left only two or three to be strike team members. *(Remember that you need to fill positions based on the number of NETs who arrive at the staging area. This means some people may need to fill more than one role.)*

# ARO Survey for Citywide Deployment Exercise (CDE) on May 7, 2022

9 responses
